

BUTTER BLOCK / SQ-01

A4 / Outline / v2 / Print at 100%

Design size: 90 x 45 x 30 mm. Verify by assembling the prototype.

- CUT: outer line and short slits
- FOLD: dashed lines; labels stay outside

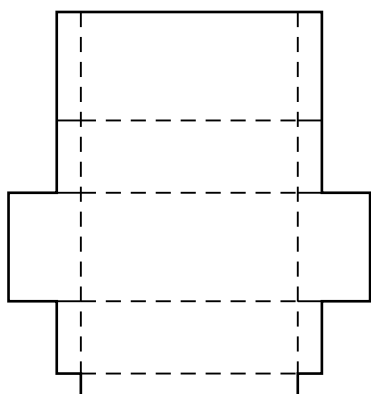

Joining tabs are inside. The bottom closes last.

MAKE YOUR BUTTER BLOCK

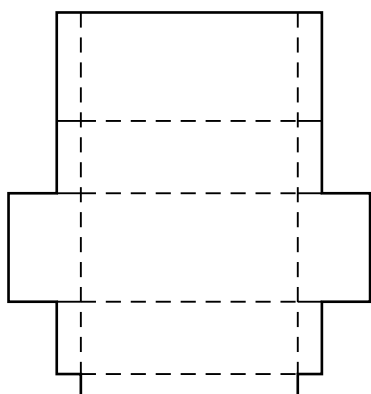

SQ-01 / v2 / Illustrated guide 1 of 2 / Not a physical test

1. Print and measure

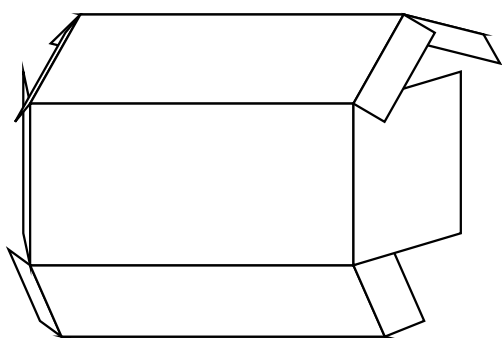

Choose A4 or US Letter to match your paper. Print the template at 100% / Actual Size, with Fit to Page off. Measure the 50 mm line. If it differs by more than 1 mm, correct the print settings before cutting.

2. Cut the connected net

Cut only the solid outer boundary and the short solid slits. Keep all six labeled faces connected. Do not cut the dashed folds. An adult should handle cutting when assistance is needed.

3. Pre-fold all dashed lines

With the labels outside, fold the left and right ends inward along the front face. Fold the top, back and bottom at their shared dashed edges. Pre-fold the joining tabs inward; keep the closure tab open.

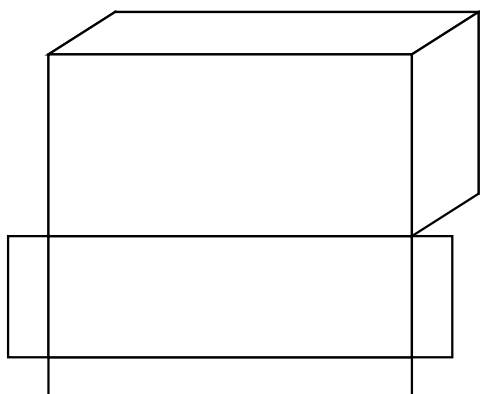

Materials: matching paper, ruler, scissors, clear tape, loose clean tissue. Use help where needed.

Original files: personal, family and classroom use. No resale or digital redistribution.

4. Join the sides and back

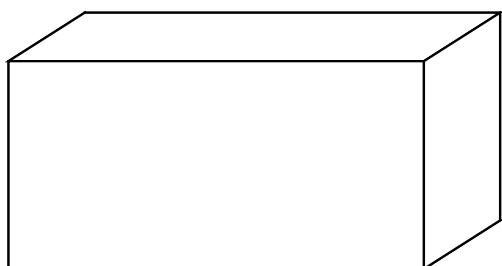

Fold the top toward the two end faces. Secure its side tabs inside the end faces with tape. Fold the back down and secure its side tabs to the same end faces. Keep the entire bottom face open so the joins stay reachable.

5. Add a small amount of filling

Turn the construction upside down so the open bottom faces up. Use a small amount of clean tissue for this prototype. Add it loosely through the open bottom. Do not pack tightly. This is a paper construction test, not a tested slow-rising toy or a product for mouthing.

6. Close the bottom last

Fold the bottom side tabs inside the end faces. Fold the bottom into place, tuck its closure tab inside the back face, then tape the final seam from outside. Check each join and lightly press once; record tearing, sticking or deformation rather than hiding it.

Materials: matching paper, ruler, scissors, clear tape, loose clean tissue. Use help where needed.
